

# TUBERCULOSIS

*Know the signs*

*Breathe easy*

## BACKGROUND

TB disproportionately impacts Indigenous communities because of the lasting effects of colonialism, like overcrowded housing.

## TB FACTS

TB is an infection that usually affects the lungs. It spreads through the air when someone with TB coughs, speaks, or sings.

## SYMPTOMS

Cough that lasts 2+ weeks, night sweats, fever, weight loss, tiredness. Get tested if you experience these symptoms.

## TREATMENT

TB can be cured with medications over many months. Treatment support is available in your community.
